Mazda B2000

1981 Wiring Diagram

INTRODUCTION

In this booklet, the whole electrical system is divided into sub systems, such as charging system, ignition system, and so on.

Index shows on which page the sub system is found and which page each component belongs to. Each system is shown on right and left pages. The upper part of the left page shows the electrical circuit and the lower part shows the configulation of each connector. Right page shows the actual location of each connector and the routing of the harness on the vehicle.

The last page X shows the common connectors related to each sub system.

This booklet incorporates the wiring schematic for the basic vehicle and its available optional equipment.

Actual vehicle wiring may very slightly depending upon optional equipment and/or local specifications.

All information in this booklet are best available at the time of printing. Toyo Kogyo reserves right to make changes in circuit and specifications without previous notice.

WIRING CODE

The first alphabet indicates the basic color for the wire, and the second alphabet indicates the stripe color.

CODE	
В	BLACK
Br	BROWN
G	GREEN
Gy	GRAY
L	BLUE
Lb	LIGHT BLUE
Lg	LIGHT GREEN
0	ORANGE
